

Tango Eye Secure

Security – For Post Covid Retailing

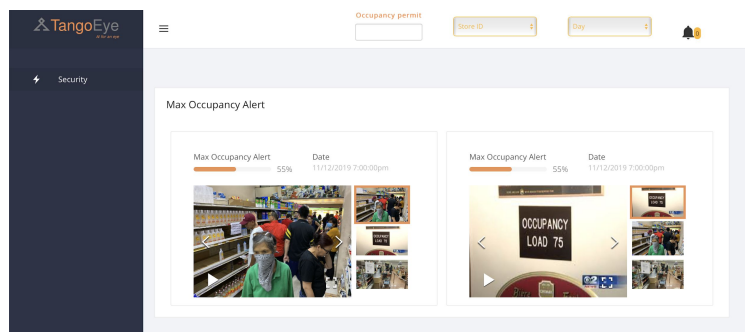

Retail industry has come under a lot of pressure amid the Covid-19 crisis. Fundamental to the problem is the fear coming in contact with an infected person. Social distancing has emerged as a widely accepted precautionary measure.

Tango Eye, a retail video analytics provider, partnering with retailers to install Tango Eye Secure. A tool that integrates with existing CCTV cameras to implement social distancing, a series of safety measures, making environments safe.

Complete with alerts, dashboard reporting and traceability.

Occupancy Limit

We enable you to set occupancy limits for each specific zone. Should there be a breach in occupancy levels, the security persons are alerted via SMS. A second layer alert is sent to the control room with live dashboard reporting.

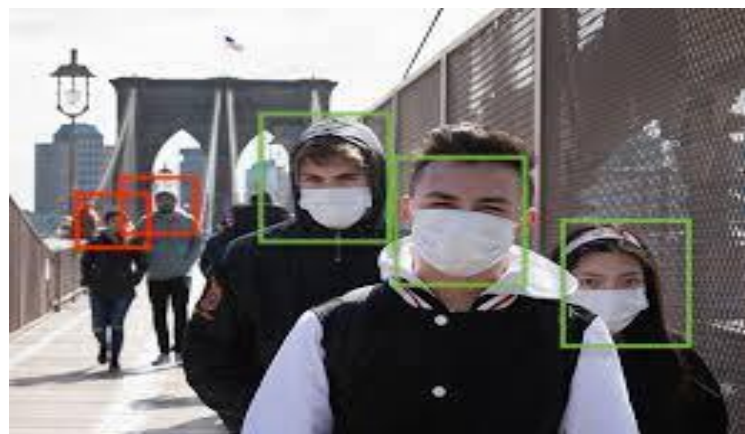

Social Distancing

Tango Eye helps building owners detect the formation of clusters and crowdedness. Security personal are alerted to take corrective measures to ensure people are maintaining a safe social distance.

Mask Compliance

Enforce the use of masks throughout the facility to limit the spread of contagious viruses.

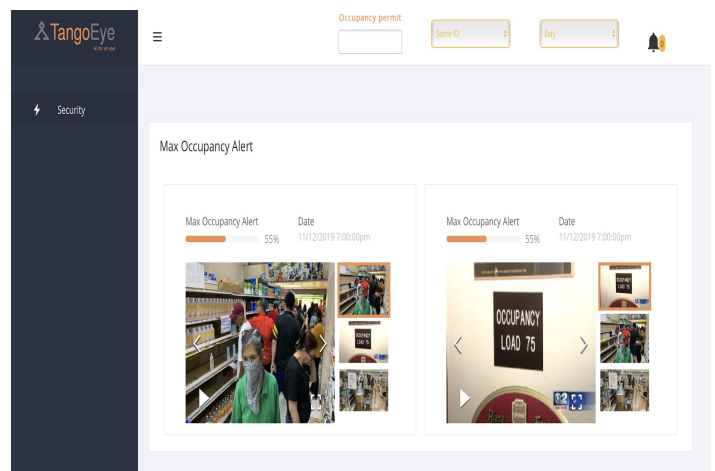

Cleaning & Sanitization Compliance

Tango Eye is able to detect cleaning efforts to help you regularize and monitor your daily cleaning activity to ensure maximum surface safety.

Live Alerts and Traceability Dashboard

In addition to real time alerts to aid store personal to take corrective measures, Tango Eye serves as a tool to look back on potential breaches that happened.

Periodic Human Remote Audit

Our support team is dedicated to supporting you through this process and will help you by running daily audits to help you through the suggested rectifications.

Partner with us to provide your customers a safe shopping environment.
