

Tango Eye **Manager**

Employee Scheduling

Track your employees *count* and monitor their activities in the store to make sure staff are deployed in the most effective way. The employee traffic patterns lets you to understand whether the staff are in the right place, at the right time for the best customer *assistance*.

Efficiency Calculator

As the system captures and tracks the efficiency of the individual the performance of the person in a given period of time is calculated by taking in consideration with few metrics like *phone usage*, *loitering* by the employee at the premises.

Employee Attendance

Our system auto detects the face as soon as it enters the premises, captures the face, recognizes the person with his ID and marks the *attendance* along with the registered username.

Streamlining checkout

Our system tracks the customers in the counter space and calculates the *time taken to checkout* from the billing area. Thus helping in preventing the long queue and increase the staffing in the counter area if required.

Store Efficiency

Our system tracks the customers in the counter space and calculates the *time taken to checkout* from the billing area. Thus helping in preventing the long queue and increase the staffing in the counter area if required.
