

Tango Eye Security

Identify Known Offenders

The system compares the real-time CCTV footage with the police *criminal* database for facial matches. These criminals when found, our system detects and recognizes their faces and sends alarm to concerned personnel's.

Threat & Weapon Detection

Our application detects all possible threats based on behaviour analysis/suspicious behaviour or facial recognition and *detect hazardous objects* such as knife, gun etc early to prevent nuisance in public and focuses more on their safety and security.

Intuitive Dashboard

Our dashboard lets you view brief reports of highest value clients, topper forming salespeople and most popular & profitable product categories.
